

TRAILER LIBERTY

Trailer-Liberty is a brand of the TRKW Automotive Technology group specializing in vehicle conversion.

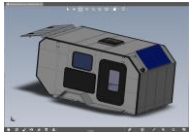

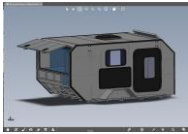

Located in the outskirts of Lisbon, Portugal, Trailer-Liberty's mission is to manufacture the highest quality and most reliable Teardrops in the market.

During the development of the Teardrop Off Road Hicker, its designer and developer emphasized aesthetics, robustness, reliability, and the quality of materials used from the early stages of 3D modeling.

Our policy of continuous quality improvement allows us to stay at the forefront of technology and design. We extend this policy to all our customers, suppliers, and industrial partners.

Everything in this Teardrop has been designed to satisfy you and provide memorable moments on board, thanks to its aesthetics, modularity, ergonomics, comfort, and, of course, its robustness.

Whether you are a fan of extended weekends or trekking through breathtaking landscapes in complete autonomy, you will find the perfect Teardrop in our Hicker, Hicker One, and Hicker One+ models.

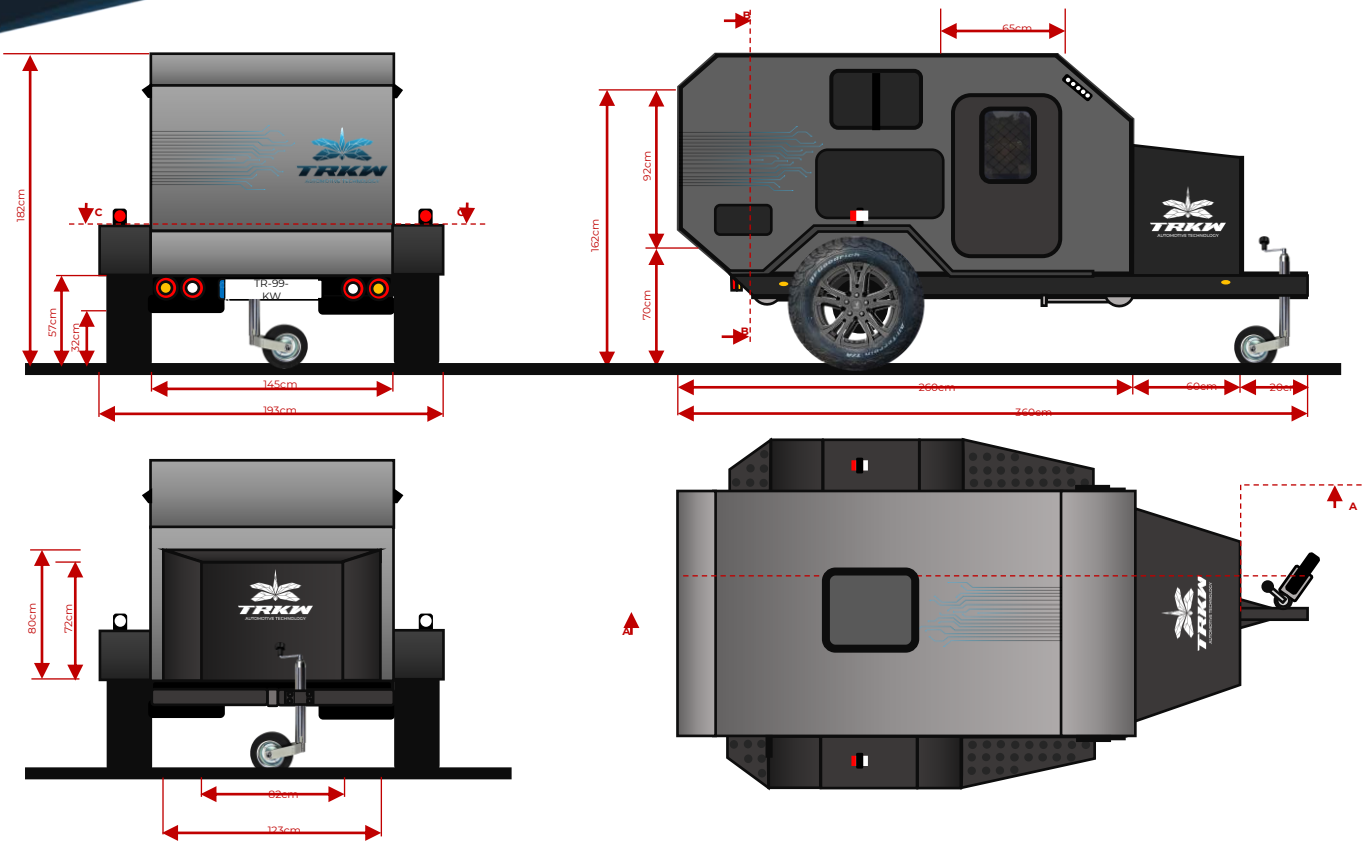

MADE IN PORTUGAL

HICKER ONE

LAYOUT

In the sleeping area, you will find a 140x200cm bed, powerful LED lighting. The sleeping cell is equipped with storage in the high position. Under the bed is a large storage space accessible from both sides with more than 250 liters in total.

The **HICKER One** is equipped with 12V-USB sockets as well as 220V sockets. A kitchen equipped with everything you need (water, gas plate, storage, etc.) is located at the back with access from the outside.

An 80Ah battery, a 2000W 220V power converter, charging by the vehicle, as well as a 46 liter tank of clean water will allow you to go hiking over a weekend in complete autonomy.

FRAME

- Steel frame with Polyurethane finish (Line-X / Raptor)
 - Al-KO axle 1300kg
 - 17" 5x112 rims
 - Full LED lights
 - 7 or 13 pin connector
 - Wheel chocks (2 units)
 - Cell in aluminum structure with Armaflex insulation and interior / exterior aluminum finish.
 - Weight in Full version of approximately 620/650Kg (in the process of finalizing series development)
 - Clearance lights
 - Mudguard / Aluminum steps
- Homologation with CoC in progress (expected to obtain September / October 2023).
 - Predicted start of production for the series November / December 2023.

Configuration of **HICKER** with the additional equipment below

Cell (exterior)

- 1 door (left side) with mosquito net that can be locked from the outside and from the inside
- 1 sliding window (left side), with mosquito net and blackout curtain
- 1 Skydome with mosquito net and blackout curtain, incorporating LED lighting (inside)

Front Box

- Recharge via the car's 12V while driving
- General circuit breaker
- Relay box for electronic control box of trailer functions.
- Butagaz cube type gas bottle
- The entire left side of the box is a storage and transport box

Cell (interior)

- Mattress 200 X 140
- Overhead lighting in Skydome
- Lighting and function control box
- 12V USB socket (2 units)
- Chest under mattress of about 300 liters
- Storage unit in high position on the back
- Furniture high position at the head of the bed

- Painting of your choice from a pre-defined range: Cold grey, warm grey, white, aluminum grey, brown, green, red (aluminium panel hot-painted in the factory). Side lighting (right and left)

- Possibility of custom color or total covering Total coating in Polyurethane type Line-X or Raptor

Kitchen area

- Gas plate (2 mouths)
- Sink with folding gooseneck faucet
- Storage cupboards in high position
- LED lighting
- USB port (2 units)
- 220V socket (1 unit)
- Locking of the kitchen part with key

Technical area under kitchen

- 40 liter clean water tank
- Gray water tank 40 liters
- (Heater location for the cell)
- On the outer right side:
- Hand shower Water pump

OPTIONS :

- Door on the left side with mosquito net that can be locked from the outside and from the inside
- Shelf on the right side
- Support for gallery or roof tent
- Thule awning 190 black
- 110Ah slow discharge battery
- 200 Ah Lithium battery
- Charging via 220V network cable
- Charging via 150 W solar panel Inverter
- 220V pure Sinus 5000W Inverter
- 220V pure Sinus 10000W
- 2kg ABC fire extinguisher
- Ambient LED lighting
- Bluetooth speakers Autonomous
- 5kw Diesel heater Hot water (Compulsory heating option)
- Bluetooth reversing camera with screen in the vehicle
- Desilting plate
- Interior reading lamp
- Reading lamp in the kitchen
- Fridge 46 liters 220V
