

# TRAILER LIBERTY

Trailer-Liberty is a brand of the TRKW Automotive Technology group specializing in vehicle conversion.

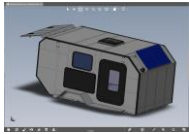

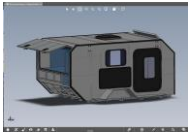

Located in the outskirts of Lisbon, Portugal, Trailer-Liberty's mission is to manufacture the highest quality and most reliable Teardrops in the market.

During the development of the Teardrop Off Road Hicker, its designer and developer emphasized aesthetics, robustness, reliability, and the quality of materials used from the early stages of 3D modeling.

Our policy of continuous quality improvement allows us to stay at the forefront of technology and design. We extend this policy to all our customers, suppliers, and industrial partners.

Everything in this Teardrop has been designed to satisfy you and provide memorable moments on board, thanks to its aesthetics, modularity, ergonomics, comfort, and, of course, its robustness.

Whether you are a fan of extended weekends or trekking through breathtaking landscapes in complete autonomy, you will find the perfect Teardrop in our Hicker, Hicker One, and Hicker One+ models.

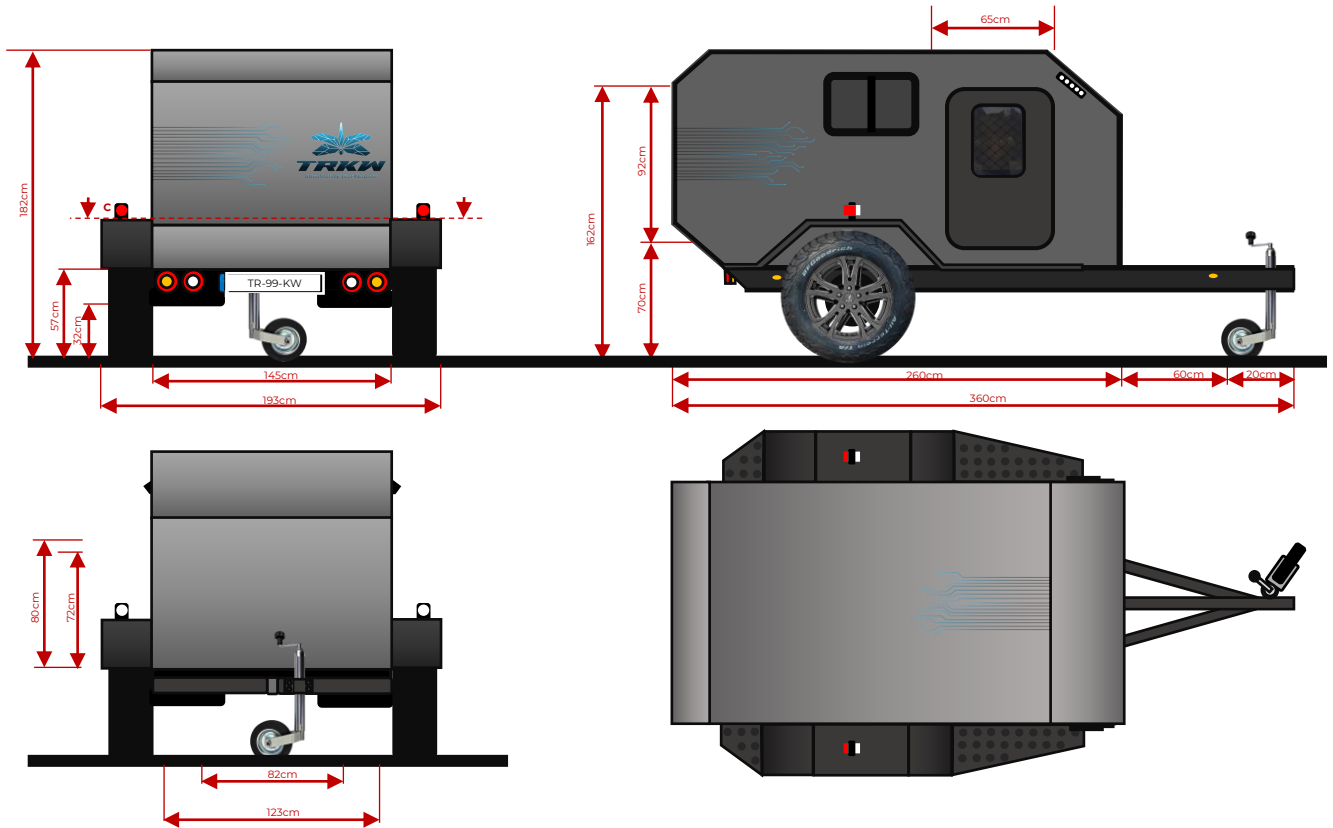

MADE IN PORTUGAL

# HICKER

## LAYOUT

The **HICKER** is a TEARDROP delivered with its chassis, its cell and its front box. The box is to be configured and fitted out by the customer

The cell is delivered with its external finish in aluminum panels (color to be chosen when ordering) as well as its white lacquered aluminum finish on the inside.

All walls are insulated with Armaflex.

The floor is marine plywood

The rear opening is part of the basic configuration, but no arrangement in the upper part (kitchen) or in the lower part (technical area) is provided.

This **HICKER** version is a base for a DIY TEARDROP. Each customer can arrange it according to his desires, his own tastes and choices.

## **HICKER**
